

## HOBOLink Service Plans

U30	RX3001 Ethernet	RX3002 Wi-Fi	RX3003 3G	RX3004 4G	RX2100 4G	MX Gateway	Renewals
Plan Number	Description		Fastest Logging Interval	Fastest Connection Interval		Annual Cost	
SP-006	Ethernet/Wi-Fi Power Plan		1 second	10 minutes		\$199	
SP-007	Ethernet/Wi-Fi Limited Plan		1 minute	10 minutes		\$99	

### RX3001 Ethernet Data Plans

- Both plans have unlimited monthly alarms
- SP-006 and SP-007 provide one (1) year of data transmission and HOBOLink service. Plan starts the day the RX3000 is registered in HOBOLink.

Updated December 1st, 2021

## HOBOLink Service Plans

U30	RX3001 Ethernet	RX3002 Wi-Fi	RX3003 3G	RX3004 4G	RX2100 4G	MX Gateway	Renewals
Plan Number	Description		Fastest Logging Interval	Fastest Connection Interval		Annual Cost	
SP-006	Ethernet/Wi-Fi Power Plan		1 second	10 minutes		\$199	
SP-007	Ethernet/Wi-Fi Limited Plan		1 minute	10 minutes		\$99	

### RX3002 Wi-Fi Data Plans

- Both plans have unlimited monthly alarms
- SP-006 and SP-007 provide one (1) year of data transmission and HOBOLink service. Plan starts the day the RX3000 is registered in HOBOLink.

## HOBOLink Service Plans

U30	RX3001 Ethernet	RX3002 Wi-Fi	RX3003 3G	RX3004 4G	RX2100 4G	MX Gateway	Renewals
3G Cellular Plans	US Only	Global	Fastest Connection Interval		Sensors	Annual Cost	
ALL 3G CELLULAR PLANS ARE ELIGIBLE FOR RENEWAL ONLY							
Premium 3G	SP-810	SP-809	10 minutes		65 Sensors	\$399	
Max-Connect 3G	SP-807	SP-808	10 minutes		25 Sensors	\$349	
Global Limited 3G	-	SP-806	4 hours		20 Sensors	\$199	
User Provided SIM	SP-600	SP-600	Unlimited		65 Sensors	\$99	

### RX3003 3G Cellular Plans

- The Fastest Logging Interval is 1 minute
- Plans shown above operate on 3G networks where available with backward compatibility for 2G coverage.
- The Premium and Maximum 3G Plans have unlimited alarms per month; the Limited Plan has a maximum of 20 alarms
- If logging statistics on the analog module, the SP-806 plan is not allowed. Please choose from the plans in the Max-Connect and Premium rows.
- These service plans provide one (1) year of cellular data transmission and HOBOLink service for RX3003 (Cellular 3G) units. Plan starts the day the RX3000 is registered in HOBOLink.
- Cellular service plans are limited to the parameters shown above. More frequent alarms, adding statistics and increasing the connection rate will impact the type of plan you should choose for your deployment. If the data used in a particular month gets close to the limit, a warning will be sent. If the data left gets too low, HOBOLink will automatically turn off its connection service. Normal operation will resume the following month.
- If selecting the SP-600, please be sure to carefully review the SIM requirements and installation instructions [here](#).
- Customers interested in purchasing a unit with SP-600 should call Onset for assistance at 1-800-564-4377.
- Users with HOBONet wireless sensors should choose Premium for up to 65 sensors.

## HOBOLink Service Plans

U30	RX3001 Ethernet	RX3002 Wi-Fi	RX3003 3G	RX3004 4G	RX2100 4G	MX Gateway	Renewals
4G Cellular Plans	US Only	Global	Fastest Connection/Logging Intervals		Sensors	Annual Cost	
Premium 4G	SP-816	SP-815	10 minutes / 1 minute		65 sensors	\$350	
Standard 4G	SP-814	SP-813	10 minutes / 1 minute		25 sensors	\$299	
Basic 4G	SP-812	SP-811	1 hour / 1 minute		20 sensors	\$199	
User-supplied SIM	SP-610	SP-610	10 minutes / 1 minute		65 sensors	\$149	
User-supplied SIM (30-minute logging rate only)	SP-611	SP-611	6 hours / 30 minutes		20 sensors	\$49	

### RX3004 4G Cellular Plans

- Fastest logging interval allowed is 1 minute.
- Plans shown above operate on 4G networks where available with backward compatibility for 2G and 3G coverage.
- The Premium and Standard plans allow unlimited alarms and the Basic Plan is limited to 20 alarms per month. Systems that will experience frequent alarms should choose Standard or Premium Plans. The Basic plan will only support limited alarming.
- Users with HOBONet wireless sensors should choose Premium for up to 65 sensors.
- US plans operate on the AT&T Network; please call with coverage concerns. Global plans are covering countries listed below. Carriers may vary.
- If logging statistics on the analog module, SP-811/SP-812 are not allowed. Please choose a Standard or Premium plan.
- These service plans provide one (1) year of cellular data transmission and HOBOLink service for RX3004 (Cellular 4G) units. Plan starts the day the RX3000 is registered in HOBOLink.
- Cellular service plans are limited to the parameters shown above. More frequent alarms, adding statistics and increasing the connection rate will impact the type of plan you should choose for your deployment. If the data used in a particular month gets close to the limit, a warning will be sent. If the data left gets too low, HOBOLink will automatically turn off its connection service. Normal operation will resume the following month.
- If selecting the SP-610 or SP-611 SIM options, please note -
  - The station will ship without a SIM card
  - The user must provide SIM card meeting the following requirements for proper function:
    - RX3004. Micro SIM for 4G LTE Network; supports UMTS/HSPA+ at 800, 850, 900, 1800, 1900, or 2100 MHz and LTE at 700, 800, 850, 900, 1800, 1900, 2100, or 2600 MHz
    - The SIM card must be activated and unlocked
    - APN for the associated carrier
  - Be sure to carefully review the SIM requirements and installation instructions [here](#).
  - Customers interested in purchasing a user-supplied SIM plan should call Onset for assistance at 1-800-564-4377.
